

Dear Hiring Manager,

I am excited to apply for the position at Rewire as a Data Analyst. As someone with a Master's degree in Cognitive Psychology and advanced SQL skills, I believe I would be a valuable addition to your team.

My academic background has provided me with a strong foundation in understanding human behavior and decision-making processes, which I believe will be particularly useful in the financial industry. Additionally, my recent completion of an advanced SQL course has equipped me with the technical skills needed to collect, analyze, and interpret large data sets.

During my academic and professional career, I have developed a strong ability to analyze data and generate meaningful insights. For example, in my previous role as a research assistant, I used data analysis to uncover patterns in human behavior, which ultimately led to the development of a new behavioral intervention.

I am particularly drawn to Rewire because of your mission to provide affordable and accessible money transfer services to underserved communities. I believe that my combination of technical and analytical skills, along with my background in cognitive psychology, would enable me to contribute to your mission in a meaningful way.

Thank you for considering my application. I am excited about the opportunity to join your team and contribute to your mission.

Sincerely,

Elad.
